

Florent Antoine

Full-Stack JavaScript Developer

Thuin · open to work

FULL PORTFOLIO
www.antoineflorent.dev

PROFILE

I'm a full-stack JavaScript developer who fell for TypeScript early and never looked back. I like owning a feature the whole way: modelling the data, designing the API, and building the UI on top of it.

EXPERIENCE

Full-Stack JavaScript Developer

Since 2024

Rush Labs · Nivelles

A software studio building products end to end for clients: web and mobile apps, backends, and AI features. I work across the stack on client projects.

STRENGTHS

Leading a small team

I lead a small team: splitting up work, creating tickets and assigning them to team members, reviewing pull requests, unblocking teammates, and keeping us moving toward the deadline.

Talking to clients

I run client meetings end to end: gathering requirements, giving progress updates, and turning what they need into clear, buildable tasks.

Shipping to production

I own production releases end to end: from staging checks and deploys to watching things settle and reacting when needed.

SELECTED WORK

Gowlz SaaS platform

2025

A SaaS suite to steer and grow an organisation.

D'leteren Luxury Performance Client site

2025

CMS migration, performance work and internal tools for D'leteren's luxury-car division.

Domaine de Donstiennes Booking platform

2025

A gîte booking platform synced with Booking.com, managed from a back office.

PAUZz Wellness app

2025

A wellbeing and mental-health mobile app.
